

Resume

Santiago Martin Landaburo

Role: Full Stack Developer

Experience: more than 3 years

Profile

Frontend Developer specializing in React and TypeScript with a Bachelor's degree in Information Systems. Experience building consumer-facing applications and enterprise solutions. Skilled in addressing technical challenges, writing high-quality code, and optimizing interfaces. Proven track record in system analysis, design, and developing microservices for notification management, utilizing technologies like NestJS and Docker. Strong abilities in quick adaptation and solving complex problems. My long-term goal is to grow into a technical leadership role while remaining hands-on with coding.

Skills & Technologies

Programming languages:	TypeScript, Javascript, Python, PHP
Databases:	PostgreSQL, MySQL, BigQuery, SQL Server
Operating Systems:	Windows, Linux (Linux Ubuntu), MacOS, Android, IOS.
Frameworks & Libraries:	React, NestJS, NodeJS, Express, Ionic/Angular, React Native, Expo
Tools and IDEs:	Node JS, Visual Studio Code, Android Studio, XCode, Docker, GraphQL, Navicat, Atom, , Git, Github, GitLab, DBeaver, Postman, Figma, Lucidchart, Slack, Google Meet,
Agile methodologies	Scrum
Others:	Design Patterns, Systems Design, Mobile Develop

Experience

- **Full Stack Developer - Bombieri**

Description: At Bombieri, I work as a Full Stack Developer, where I create user interfaces with React, meticulously following a design. In addition, I handle server-side tasks using Nest JS and use Postgre SQL as a database. I also use Docker for containerization and Git for version control.

In addition, I contribute as an analyst, participating in requirements analysis and development to ensure project success from a strategic perspective.

Main Features:

- I have been able to adapt and learn in the face of changing situations.
- I have been able to take a leading role in projects by making decisions and contributing my ideas to help my colleagues.
- Referent in frontend development with React creating components that have been reused.
- Generate confidence to my leaders that allow me to make decisions and participate in meetings with clients to give my point of view.

My responsibilities/Deliverables were:

- Provide optimal solutions mainly in frontend.
- To provide an overall view of the project in order to be able to prevent a possible mishap in the event of a given action.

Skills & Technologies: React, Typescript, NestJS, PostgreSQL, Scrum, Gitlab, Github, Git, Figma

Team size: 18 Big team ; 3 Small team

Duration: More than 3 years – ongoing

- **Frontend Developer– Rebrit SRL**

Description: At Rebrit SRL, I performed frontend tasks, meticulously adhering to pixel-perfect design guidelines. Additionally, I handled the integration with the PHP backend, ensuring seamless communication between the frontend and backend components. Git was also used for version control to maintain codebase integrity.

My responsibilities/deliverables were:

- Develop interfaces following a design.

Skills & Technologies: HTML, CSS, Javascript, PHP, MySQL, Apache

Team size: 10 member

Duration: 3 months

- **Student – Final Integrative project. Subject “FunkoPop Store”**

Description: Final integrative project to obtain the degree of Systems Analyst, which involved an e-commerce site to sell Funko Pops in the city of Concepción del Uruguay.

My responsibilities/deliverables were:

- Analyze and design the system
- Develop Frontend and Backend
- Document

Skills & Technologies: React, NestJS, Typescript, GraphQL, PostgreSQL

Team size: 3 members

Duration: 9 month

- **Personal Project – Project Idea, Subject "Photocopiers Project"**

Description: The idea was about a platform where a person can upload their PDF, and the system returns the photocopiers in the city where they can make a copy, sorted by price.

Skills & Technologies: Python, Flask, Firebase, MongoDB.

Team size: 1 member

Duration: 4 months
