About Me

I am a Systems Information graduate and Full Stack Software Engineer with more than 5 years of experience developing web applications and scalable solutions.

I specialize in building products for startups, prioritizing agile delivery, software quality, and business-oriented solutions.

Thanks to my broad understanding of the projects I have worked on, along with strong communication and leadership skills, I have taken on team coordination responsibilities.

I am currently looking for new challenges that allow me to continue growing both technically and professionally.

Professional Experience

Bombieri

Full Stack Software Engineer & Team Leader | 2021 – Present

- Participated in the development of a dropshipping startup, contributing to product co-creation, solution design, and platform development. The work carried out by the team helped strengthen the relationship with the client, leading to a one-year contract extension and team expansion.
- Collaborated on the evolutionary development of a mobile application for accountants and a banking chatbot, implementing new features, technical improvements, and optimizations on existing platforms.
- Participated in projects focused on both startups and internal enterprise systems, adapting to different business contexts and technical challenges.
- At the end of 2025, I was appointed Team Leader of a development cell, where I strengthened my leadership, communication, and team coordination skills.
- My responsibilities include:
 - Organizing and tracking team activities.
 - Providing professional mentoring and facilitating communication between technical and business areas.
 - Promoting collaboration and continuous improvement within the team.

React • TypeScript • NestJS • PostgreSQL • Java • Ionic/Angular • Docker • IBM Cloud

Rebrit SRL

Frontend Developer | 2021

- Developed user interfaces for fintech platforms, prioritizing user experience, scalability, and product maintainability.
